

SUNSHINE Boosters™

Complete Nutrition System

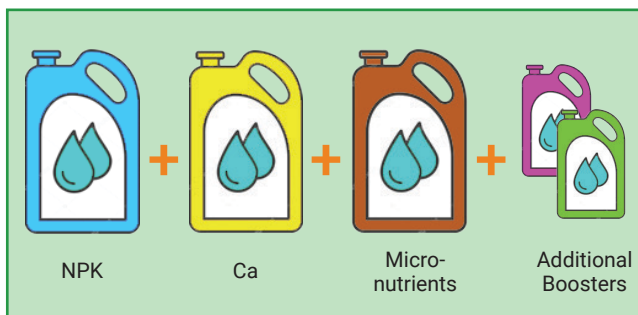

- Just add water! -

Precisely what your plants need
and nothing they don't

Amino acid based

NO EDTA chelators, no nutrients lockup!

- New generation of smart amino acid based fertilizers and micronutrients
- Precise and perfectly balanced formulas designed for every watering and complete nutrient intake

Use every time
you water

Proud of what is NOT in our plant food:

EDTA, ammonia salts, urea, components of animal origin or products of its processing.

Can be used to grow vegan food.

Get to Know Us!

SUNSHINE Boosters™ come from 20 years in the exotic plant business with 30,000+ plants, 2,000+ species, and on-staff plant scientists and engineers.

The quantity and quality of THC/CBD can be increased significantly with science-based growing techniques.

Helping you with Precision Growing:

- Optimum Staged Fertilizers and Hormones
- Custom Irrigation Installs
- Our Own Web-Based Application and Controller

Engineering approach to plant growing

Maximizing grow yield by boosting size and quality using advanced nutrition and environmental control

- Controlled environment
- Growing consistency and predictability
- Eliminating "green thumb" human factor
- Faster growing and development
- Maximizing plant potential

Higher yield, better quality crop

PRECISION GROWING with

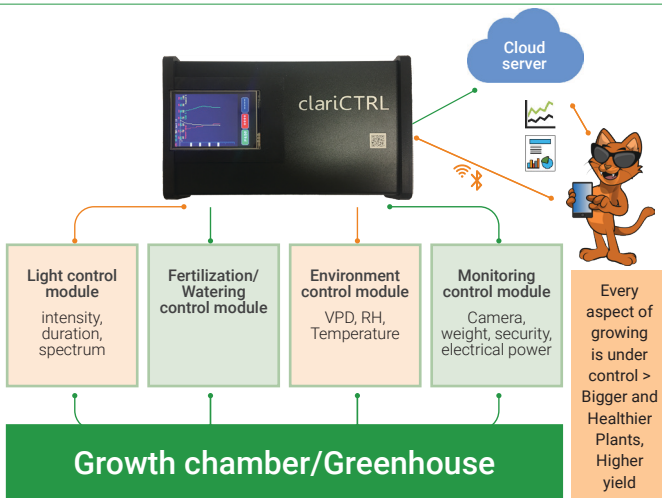

SUNSHINE BOOSTERS

Complete Plant Nutrition Made Simple
Smart Plant Growth Control

SunshineBoosters.com

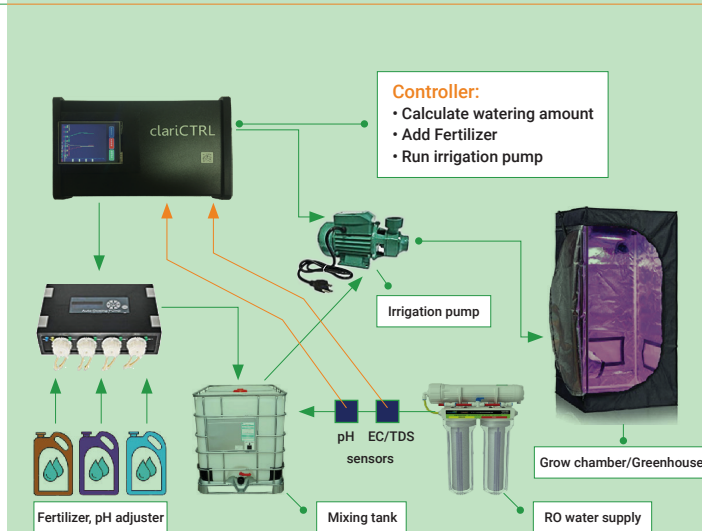

Smart Plant Growth Control

- High accuracy and flexibility, combined with ease of use
- High-reliability is essential: high-value crop (sometimes irreplaceable)
- Precise CO₂ concentration, humidity, temperature, and tight pH range control
- Controlled dosing and sampling, long-term, flexible, responsive sequencing
- One-button setup, even for complex multi-stage data-driven growth cycles
- Accurate and detailed logging over time periods from seconds to months
- Easily reconfigurable communications
- Email and text alerts, Wi-Fi, Ethernet, USB, Bluetooth
- Remote and standalone control and monitoring (smartphone / PC / tablet)

Fertilization Control

SUNSHINE Boosters™ Benefits

COMPLETE & SIMPLE

- Only 3 easy components for a complete feed, just mix with daily watering. The basic set of boosters consists of 4 solutions, using only 3 of them at the same time.
 - Perfectly soluble, great for irrigation systems with streaming dispensers.
 - Contain all essential nutrients for each stage of plant development.
 - Not just NPK: Provides amino acids that play a fundamental role in plant metabolism.
- Includes additional boosters and bio stimulants for stress protection and maximizing plant potential.

SAFE

- Organic- and Amino- acids greatly enhance stability of the solutions and provide excellent absorption of trace elements.
- Plant-, Eco-, Insect-, and Vegan-friendly

CROP TASTE

SUNSHINE Boosters™ are proven to not affect the taste. They are formulated for plants that are meant to be volatilized (turned into a vapor) like marijuana.

NO FLUSHING

SUNSHINE Boosters™ compounds do not contain excess nutrients. You do not need to flush the substrate before harvesting and may continue using the boosters at all stages without additional flushing.
